## Probiotic based

Cerbios is on the market for over 40 years with its proprietary probiotic strain *Enterococcus lactis* SF68®, (formerly *E.faecium*) registered as drug product (e-CTD dossier) for the treatment of diarrhea and dysbiosis (more than 40 clinical trials published).

Given the increasing interest on microbiota and role of probiotics on prevention, diagnosis and treatment of various pathologies, Cerbios is engaged to further investigate potential applications of its strain in different areas:

Pathologies	R&D & proof of concept	Industrial Validation	Clinical trial Scientific evd.	Registration file ready for submission
