

CERBIOS NEW HPAPI PRODUCTION PLANT APPROVED BY SWISSMEDIC

Cerbios-Pharma is pleased to announce the approval by Swissmedic of its new HPAPI plant, which forms the latest addition to its plan of expansion into the manufacture of highly potent drug substances.

This new production line is dedicated to highly active products with containment allowing OEL up to 30 ng/m³ and enabling manufacture up to 35 kg batch size.

The new plant, featuring reactors up to 1000 L and pressure-filter-dryer, will extend the manufacturing capacity and complement the existing HPAPI facilities with a broad range of batch sizes and services.

Christian Suà, CEO: “With these implementations Cerbios is continuing its program of investments and expanding its offer of CDMO services for the manufacture of highly potent drugs, which represent one of the strategic cores of our business”.

The recently introduced equipment amplifies the company's know-how in technologies such as preparative purification at medium/high pressure and nanofiltration, key for the manufacture of HPAPIs and cytotoxic payloads used in ADCs.

About Cerbios-Pharma SA

Cerbios is a private sector company with head office located in Lugano, Switzerland. It specializes in developing and manufacturing active pharmaceutical ingredients (APIs), both chemical and biological, for its international clients. Cerbios is a world leader for various generic products used primarily to treat respiratory, dermatological, and oncological diseases.

Cerbios also offers its clients an exclusive service for the development and production of highly active pharmaceutical ingredients (HAPIs), recombinant proteins, conjugated monoclonal antibodies (ADCs) and probiotics for pharmaceutical use.

Cerbios provides a complete service for the development and registration of new pharmaceutical products that are supplied for clinical research phases, and the subsequent regulatory documentation needed for the marketing supply chain. Cerbios products are marketed worldwide, primarily in the USA, Japan, and Europe.
